@QEDunham

Talks.edunham.net/pdxdevops2017

# DevOps

Humans behave unpredictably.

Reduce conflicts by  
setting expectations.

# Rust's Expectations

“...most impressive aspect of Rust is the **welcoming community** that supports it. This community could become Rust's **not-so-secret weapon.**”

- <http://www.infoworld.com/article/2947214/open-source-tools/two-reasons-the-rust-language-will-succeed.html>

“The Rust community seems to be **populated entirely by human beings.** I have no idea how this was done.”

- <http://scattered-thoughts.net/blog/2015/06/04/three-months-of-rust/>

# The Rust Code of Conduct

---

## Conduct

**Contact:** [rust-mods@rust-lang.org](mailto:rust-mods@rust-lang.org)

- We are committed to providing a friendly, safe and welcoming environment for all, regardless of level of experience, gender, gender identity and expression, sexual orientation, disability, personal appearance, body size, race, ethnicity, age, religion, nationality, or other similar characteristic.
- On IRC, please avoid using overtly sexual nicknames or other nicknames that might detract from a friendly, safe and welcoming environment for all.
- Please be kind and courteous. There's no need to be mean or rude.
- Respect that people have differences of opinion and that every design or implementation choice carries a trade-off and numerous costs. There is seldom a right answer.
- Please keep unstructured critique to a minimum. If you have solid ideas you want to experiment with, make a fork and see how it works.
- We will exclude you from interaction if you insult, demean or harass anyone. That is not welcome behaviour. We interpret the term "harassment" as including the definition in the [Citizen Code of Conduct](#); if you have any lack of clarity about what might be included in that concept, please read their definition. In particular, we don't tolerate behavior that excludes people in socially marginalized groups.
- Private harassment is also unacceptable. No matter who you are, if you feel you have been or are being harassed or made uncomfortable by a community member, please contact one of the channel ops or any of the [Rust moderation team](#) immediately. Whether you're a regular contributor or a newcomer, we care about making this community a safe place for you and we've got your back.
- Likewise any spamming, trolling, flaming, baiting or other attention-stealing behaviour is not welcome.

---

## Moderation

These are the policies for upholding our community's standards of conduct in our communication channels, most notably in Rust-related IRC channels.

1. Remarks that violate the Rust standards of conduct, including hateful, hurtful, oppressive, or exclusionary remarks, are not allowed. (Cursing is allowed, but never targeting another user, and never in a hateful manner.)
2. Remarks that moderators find inappropriate, whether listed in the code of conduct or not, are also not allowed.
3. Moderators will first respond to such remarks with a warning.
4. If the warning is unheeded, the user will be "kicked," i.e., kicked out of the communication channel to cool off.
5. If the user comes back and continues to make trouble, they will be banned, i.e., indefinitely excluded.
6. Moderators may choose at their discretion to un-ban the user if it was a first offense and they offer the offended party a genuine apology.
7. If a moderator bans someone and you think it was unjustified, please take it up with that moderator, or with a different moderator, **in private**. Complaints about bans in-channel are not allowed.
8. Moderators are held to a higher standard than other community members. If a moderator creates an inappropriate situation, they should expect less leeway than others.

In the Rust community we strive to go the extra step to look out for each other. Don't just aim to be technically unimpeachable, try to be your best self. In particular, avoid flirting with offensive or sensitive issues, particularly if they're off-topic; this all too often leads to unnecessary fights, hurt feelings, and damaged trust; worse, it can drive people away from the community entirely.

And if someone takes issue with something you said or did, resist the urge to be defensive. Just stop doing what it was they complained about and apologize. Even if you feel you were misinterpreted or unfairly accused, chances are good there was something you could've communicated better — remember that it's your responsibility to make your fellow Rustaceans comfortable. Everyone wants to get along and we are all here first and foremost because we want to talk about cool technology. You will find that people will be eager to assume good intent and forgive as long as you earn their trust.

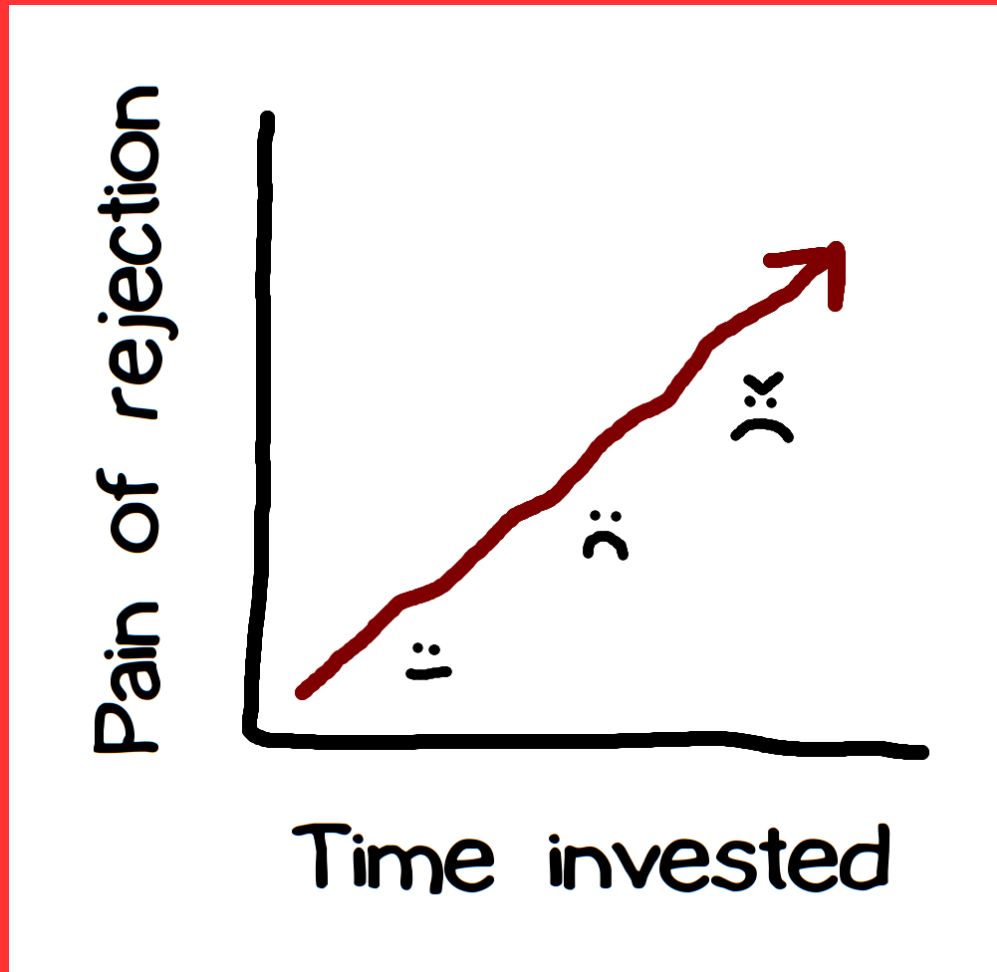

*Adapted from the [Node.js Policy on Trolling](#) as well as the [Contributor Covenant v1.3.0](#).*

# You can set expectations

- Local laws & company policy are MVP
- Get buy-in for explicit guidelines
- Build on positive in-jokes / culture
- Put reminders where they're needed
- CONTRIBUTING.txt in public projects

Rejecting changes can cause conflicts.

Communicate (& document)  
**early and often**  
about **what to do**  
and **who's doing it.**

# Rust's RFC process

“We ask that [larger changes] be put through a bit of a design process and produce a consensus

... so that all stakeholders can be confident about the direction the language is evolving in.”

- <https://github.com/rust-lang/rfcs/>

# Rust & Servo's Distributed Teams

# You can require communication

- Require design docs before landing changes
- Ask docs first; answer from docs
- Identify & reduce penalties for communication

**AUTOMATICALLY MAINTAIN  
A REPOSITORY OF CODE THAT  
ALWAYS PASSES  
ALL THE TESTS**

<http://graydon.livejournal.com/186550.html>

# Rust & Servo use Homu

- <https://github.com/servo/homu>
- Test tree's state after landing r+'d PR

- Offer guidance & assign reviewer

**rust-highfive** commented 4 hours ago

The Rust Programming Language member

Thanks for the pull request, and welcome! The Rust team is excited to review your changes, and you should hear from [@alexcrichton](#) (or someone else) soon.

If any changes to this PR are deemed necessary, please add them as extra commits. This ensures that the reviewer can see what has changed since they last reviewed the code. Due to the way GitHub handles out-of-date commits, this should also make it reasonably obvious what issues have or haven't been addressed. Large or tricky changes may require several passes of review and changes.

Please see [the contribution instructions](#) for more information.
